WEBINAR:

The Real Cost of Hand Protection
Against Mechanical Risks

27 October 2026, 2:00–3:00 pm CET (1:00 pm UK)

Webinar: The Real Cost of Hand Protection Against Mechanical Risks

What is the real cost of a hand-protection decision? Not just the price of the glove.

ATG® and ENSHPO invite you to a free 60-minute webinar on **27 October 2026, 2:00–3:00 pm CET (1:00 pm UK)**. It's in English and online.

ENSHPO

Hand protection is often judged by purchase price, but the consequences of that decision reach much further. This session looks at three connected costs:

- ◆ **The human cost:** what serious hand injury can mean for the person, at work and in everyday life
 - ◆ **The business cost:** lost time, investigations, disruption and regulatory consequences
 - ◆ **The protection cost:** performance, durability, wearer acceptance, laundering, replacement frequency and cost-in-use

ENSHPO

It's a single conversation that moves from consequence, to decision-making, to better practice. We'll cover:

- ✓ What happens when protection fails
- ✓ Why the wrong protection gets selected
- ✓ What effective protection requires: task, hazard, grip, dexterity, comfort and fit
- ✓ What a glove really costs over its lifetime
- ✓ A practical approach: Assess → Specify → Trial → Review → Implement

ENSHPO

The session ends with a moderated live Q&A with the speakers.

Who it's for: safety and OSH professionals who assess risk, specify PPE or influence hand-protection decisions. It's also relevant to procurement, PPE buyers, operations, engineering, facilities and safety consultants.

ENSHPO

Meet the speakers

 Francesco Santi, President, ENSHPO and AIAS (moderator): Francesco Santi is President of ENSHPO, the European Network of Safety and Health Professional Organisations, and of AIAS, the Italian professional association for environment and safety. An engineer and entrepreneur, he works to strengthen cooperation between OSH professional bodies across Europe and to support the recognition of OSH practitioners. He will moderate the conversation and the live Q&A.

ENSHPO

Meet the speakers

 David Donnelly CMIOSH CRWM, Chair, IOSH Northern Ireland Community: David is a Chartered Safety and Health practitioner, Health and Safety Manager, safety speaker, H&S trainer and assessor. He is committed to advancing good practice, supporting professional development and helping organisations improve occupational safety and health standards. He also volunteers as Chair of the IOSH NI Community and for WISHNI, the IOSH Environmental and Waste Management Community and CIWM.

ENSHPO

Meet the speakers

 Ian Pollard, Regional Manager UK South and ROI, ATG Gloves: Ian has spent more than 20 years in hand protection. He works with EHS, procurement and operations teams across a wide range of industries, helping them find gloves that suit both the job and the people doing it. His approach is simple: if a glove isn't comfortable, it won't get worn, and if it isn't worn, it isn't protecting anyone.

ENSHPO

 **17** **27 October 2026** |  **2:00–3:00 pm CET (1:00 pm UK)**

The session ends with a moderated live Q&A with the speakers.
